The high-performance changer
for dispensing large quantities of coins

- Very high coin capacity
- Easy to operate/easy to service
- Intelligent coin refilling and fast emptying

Money changing systems | Cash handling and payment systems
Cash machine systems | Service machines
Customer-specified solutions

GAUSELMANN
group

Highlights

- **Very high coin capacity**
up to € 44.000 in 2 € Coins.
- **Easy to use and easy to service**
thanks to top filling of the changing system and optimum operating height for inserting banknotes and coins
- **Intelligent coin refilling and fast emptying**
thanks to the installation of two power filling units, each above the dispensing hopper.

System design

- **Choice of banknote validator:**
JCM EBA 34
with banknote cashbox for 400 or 550 banknotes
JCM UBA 10
with banknote cashbox for 500 or 800 banknotes

Both top products from Japan Cash Machine enable a very high acceptance rate for Euro banknotes (€5 to €200), fast processing of the banknotes thanks to centring and a high level of security during banknote processing thanks to the anti-pullback unit.

The sensor system of the JCM UBA is optimally adapted to the Euro currency.

This banknote validator can also be optionally equipped with a banknote drawer for up to 800 banknotes (manufacturer's information).

- **Illuminated interchangeable advertising space**

Options

- **Coin validator**
also makes it possible to change coins into coins or purchase tokens.
- **Floor plate**
A shallower floor plate can also be used.
- **Coin dispensing like in a casino**
The payout tray is designed as a receptacle for a "cup". Banknotes and coins can only be accepted after the collecting cup is placed in the receptacle.

- **Two hoppers with extremely high capacity**
Housing = hopper top unit
- **Power filling unit for both dispensing units (hopper)**
The power filling unit fulfils two requirements:
 - ▶ Continuous feeding of coins into the respective hopper.
This makes it possible to replace the hopper without having to remove the stock of money first.
 - ▶ Fast emptying of the money changer without counting the coins.
Simply flip the switch and the coins are dispensed from the module.
- **Fast and parallel block payout of the coins, and all this with a high level of security.**

Technical data

(all data indicated are only approximate)

Dimensions

(height / width / depth)
171 / 50 / 40 cm

Floor plate

(width / depth)
91 / 75 cm
Reduced floor plate
(width / depth)
74 / 50 cm

Weight

Money changer	95 kg
